TABLE OF CONTENTS

to Volume 65, May–August 1970

ALLEN, ELIZABETH F., ISIDORA ALBRECHT and JOHN W. DRAKE, Properties of bacteriophage T4 mutants defective in DNA polymerase 187–200

ASATO, YUKIO and CLAIR E. FOLSOME, Temporal genetic mapping of the blue-green alga *Anacystis nidulans* 407–419

AVIVI, LYDIA, MOSHE FELDMAN and WALTER BUSHUK, The mechanism of somatic association in common wheat, *Triticum aestivum* L. II. Differential affinity for colchicine of spindle microtubules of plants having different doses of the somatic-association suppressor 585–592

BAKER, R. L. and F. R. M. COCKREM, Selection for body weight in the mouse at three temperatures and the correlated response in tail length 505–523

BENDICH, ARNOLD J. and BRIAN J. MCCARTHY, DNA comparisons among barley, oats, rye, and wheat 545–565

BENDICH, ARNOLD J. and BRIAN J. MCCARTHY, DNA comparisons among some biotypes of wheat 567–573

BIELIG, L. M. and C. J. DRISCOLL, Substitution of rye chromosome $5R^{L}$ for chromosome 5B of wheat and its effect on chromosome pairing 241–247

BLOOM, STEPHEN E., EDWARD G. BUSS and G. K. STROTHER, Cytological and cytophotometric analysis of binucleated red blood cell mutants (*bn*) in turkeys (*Meleagris gallopavo*) 51–63

BOHREN, B. B., T. B. KINNEY, S. P. WILSON and P. C. LOWE, Genetic gains in annual egg production from selection on part-record percent production in the fowl 655–667

BRAEND, M., Genetics of horse acidic prealbumins 495–503

BRECKENRIDGE, LEE and LUIGI GORINI, Genetic analysis of streptomycin resistance in *Escherichia coli* 9–25

CHALMERS, JR., JOHN H. and J. A. DEMOSS, Genetic control of a multienzyme complex: subunit structures of mutationally altered forms 213–221

COLAIANNE, JAMES J. and A. E. BELL, Sonless, a sex-ratio anomaly in *Drosophila melanogaster* resulting from a gene-cytoplasm interaction 619–625

CRAWFORD, I. P., S. SIKES, N. O. BELSER and L. MARTINEZ, Mutants of *Escherichia coli* defective in the B protein of tryptophan synthetase. III. Intragenic clustering 201–211

EFRON, Y., Tissue specific variation in the isozyme pattern of the AP_1 acid phosphatase in maize 575–583

FRANKLIN, IAN and R. C. LEWONTIN, Is the gene the unit of selection? 707–734

FRASER, ALEX, Variation of scutellar bristles in Drosophila. XVI. Major and minor genes 305–309

GABAY, SUSAN J. and JOHN R. LAUGHNAN, Genetic analysis of the aberrant behavior of an X-chromosome duplication in the germ line of *Drosophila melanogaster* males 249–265

GRELL, E. H., Distributive pairing: mechanism for segregation of compound autosomal chromosomes in oocytes of *Drosophila melanogaster* 65–74

GUPTA, S. B., Biochemical aspects of the inheritance of floral anthocyanins in diploid alfalfa 267–278

HARTL, D. L. and M. M. GREEN, Genetic studies of germinal mosaicism in *Drosophila melanogaster* using the mutable w^{c} gene 449–456

HEDRICK, PHILIP W., Selection in finite populations. I. The probability of fixation and rate of response using transition matrix iteration 157–173

HEDRICK, PHILIP W., Selection in finite populations. II. The selection limit and rate of response for a Monte Carlo simulation model 175–186

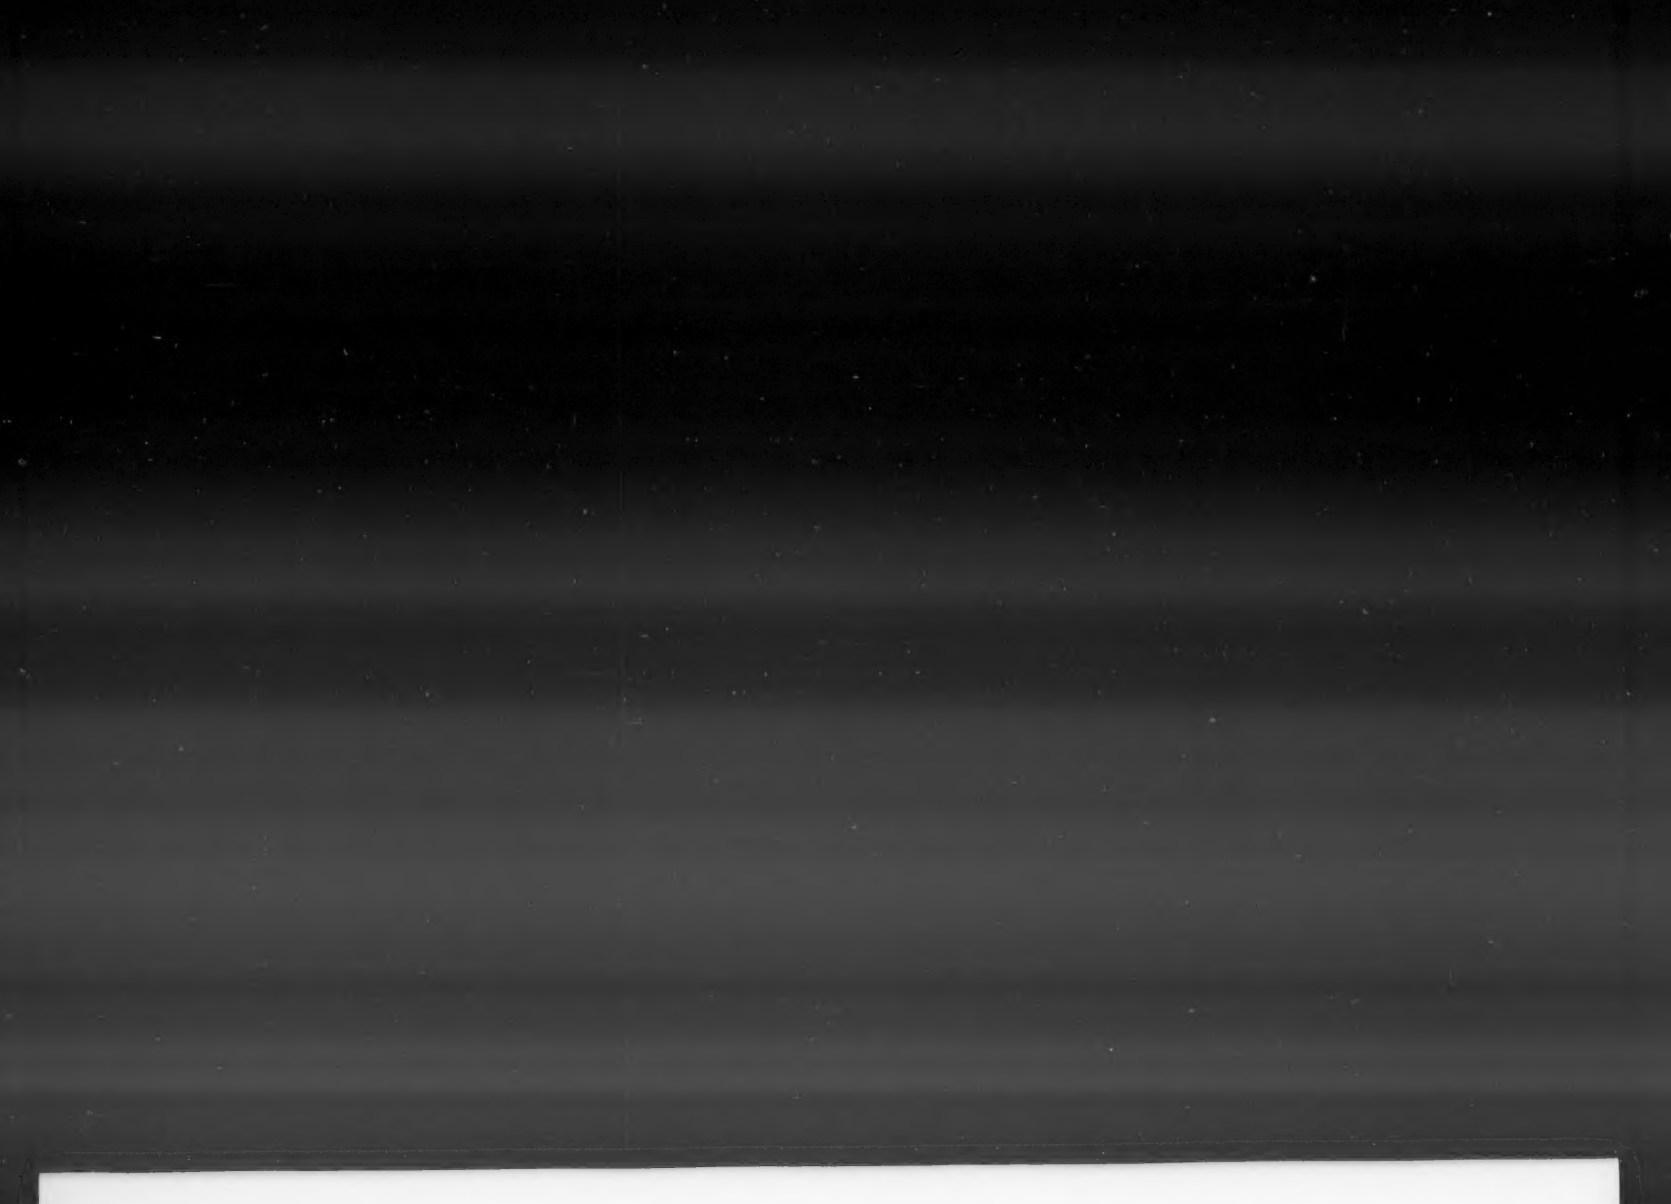
IKEDA, HIROSHI, The cytoplasmically-inherited "sex-ratio" condition in natural and experimental populations of *Drosophila bifasciata* 311–333

IRR, JOSEPH and ELLIS ENGLESBERG, Nonsense mutants in the regulator gene *ara C* of the L-arabinose system of *Escherichia coli* B/r 27–39

JOSHI, S. R., E. C. PAGE, E. ARNOLD, Y. BISHOP and S. S. EPSTEIN, Fertilization and early embryonic development subsequent to mating with TEPA-treated male mice 483–494

KIMURA, MOTOO and TOMOKO OHTA, Probability of fixation of a mutant gene in a finite population when selective advantage decreases with time 525–534

KOCH, ROBERT E. and JOHN W. DRAKE, Cryptic mutants of bacteriophage T4 379–390

KORN, ROBERT W., Induction and inheritance of morphological mutations in *Cosmarium turpinii* Breb. 41–49


LANGE, EUGENE L. and A. E. BELL, Genetic variation in chaetae number of Tribolium 669–679
MANGE, ARTHUR P., Possible nonrandom utilization of *X*- and *Y*-bearing sperm in *Drosophila melanogaster* 95–106
MANGELSDORF, PAUL C., DONALD F. JONES 1–7
MATTSON, T. L., Recombination of bacteriophage T4 stimulated by 9-aminoacridine 535–544
MCMILLAN, I., M. FITZ-EARLE and D. S. ROBSON, Quantitative genetics of fertility. I. Lifetime egg production of *Drosophila melanogaster*—Theoretical 349–353
MCMILLAN, I., M. FITZ-EARLE, L. BUTLER and D. S. ROBSON, Quantitative genetics of fertility. II. Lifetime egg production of *Drosophila melanogaster*—Experimental 355–369
METCALFE, JUDITH A., Developmental genetics of thoracic abnormalities of dumpy mutants of *Drosophila melanogaster* 627–654
MILKMAN, ROGER D., The genetic basis of natural variation. X. Recurrence of *cve* polygenes 289–303
MORROW, JOHN, Genetic analysis of azaguanine resistance in an established mouse cell line 279–287
MUKAI, TERUMI, Viability mutations induced by ethyl methanesulfonate in *Drosophila melanogaster* 335–348
MURRAY, MERRITT J. and DAVID E. LINCOLN, The genetic basis of acyclic oil constituents in *Mentha citrata* Ehrh. 457–471
PEACOCK, W. J., Replication, recombination, and chiasmata in *Goniaea australasiae* (Orthoptera:Acrididae) 593–617
RAKHA, FAROUK AHMED and D. S. ROBERTSON, A new technique for the production of A–B translocations and their use in genetic analysis 223–240
ROBERTS, PAUL A., Screening for X-ray-induced crossover suppressors in *Drosophila melanogaster*: Prevalence and effectiveness of translocations 429–448
SCHARLOO, W., Stabilizing and disruptive selection on a mutant character in Drosophila. II. Polymorphism caused by a genetical switch mechanism 681–691
SCHARLOO, W., Stabilizing and disruptive selection on a mutant character in Drosophila. III. Polymorphism caused by a developmental switch mechanism 693–705
SHIH, KATHERINE LU and R. ALEXANDER BRINK, Effects of X irradiation and gamma irradiation on paramutation in *R* heterozygotes in maize 473–482
SINNOCK, POMEROY, Concurrent inbreeding and selection in *Drosophila pseudoobscura* 133–143
SIROTNAK, FRANCIS M., Increased dihydrofolate reductase synthesis in *Diplococcus pneumoniae* following translatable alteration of the structural gene. III. Further evidence on the extent of genic involvement 391–406
TAKANO, ISAMU and YASUJI OSHIMA, Mutational nature of an allele specific conversion of the mating type by the homothallic gene HO_a in Saccharomyces 421–427
TANTAWY, A. O. and A. A. TAYEL, Studies on natural populations of Drosophila. X. Effects of disruptive and stabilizing selection on wing length and the correlated response in *Drosophila melanogaster* 121–132
TIMON, V. M., E. J. EISEN and J. M. LEATHERWOOD, Comparisons of *ad libitum* and restricted feeding of mice selected and unselected for postweaning gain. II. Carcass composition and energetic efficiency 145–155
TOBARI, IZUO and MOTOI MURATA, Effects of X rays on genetic loads in a cage population of *Drosophila melanogaster* 107–119
TOKUNAGA, CHIYOKO, The effects of low temperature and aging on nondisjunction in Drosophila 75–94
WEIR, B. S., Equilibria under inbreeding and selection 371–378
